```

Two-digit month [01, 12]: 04

```
In [5]: res=cd.strftime("%b")
print("\nShort version of month", res)
```

Short version of month Apr

```
In [6]: res=cd.strftime("%B")
print("\nFull name of month:",res)
```

Full name of month: April

```
In [7]: res=cd.strftime("%j")
print("\nDays of the year:", res)
```

Days of the year: 099

```
In [8]: res=cd.strftime("%D")
print("\nShortcut for %m/%d/%y (e.g., 04/18/12):", res)
```

Shortcut for %m/%d/%y (e.g., 04/18/12): 04/09/26

```
In [9]: res=cd.strftime("%d")
print("\nTwo-digit day [01, 31]:", res)
```

Two-digit day [01, 31]: 09

```
In [10]: res=cd.strftime("%a")
print("\nShort version of day", res)
```

Short version of day Thu

```
In [11]: res=cd.strftime("A")
print("\nFull name of a day:", res)
```

Full name of a day: A

```
In [12]: res=cd.strftime("%H")
print("\nHour (24-hour clock) [00, 23]:",res)
```

Hour (24-hour clock) [00, 23]: 13

```
In [13]: res=cd.strftime("%I")
print("\nHour (12-hour clock) [01, 12]",res)
```

Hour (12-hour clock) [01, 12] 01

```
In [14]: res=cd.strftime("%M")
print("\nTwo-digit minute [00, 59]:", res)
```

Two-digit minute [00, 59]: 54

```
In [15]: res=cd.strftime("%S")
print("\nSecond (00, 61] (seconds 60, 61 account for leap seconds):",res)
```

Second (00, 61] (seconds 60, 61 account for leap seconds): 29

```
In [16]: res=cd.strftime("%F")
print("\nShortcut for %Y-%m-%d (eg, 2012-4-18):",res)
```

Shortcut for %Y-%m-%d (eg, 2012-4-18): 2026-04-09

```
In [17]: res=cd.strftime("%f")
print("\nMicrosecond as an integer, zero-padded (from 000000 to 999999);", res)
```

Microsecond as an integer, zero-padded (from 000000 to 999999); 361622

In [18]:

```
In [19]: res=cd.strftime("%p")
         print("\nLocale equivalent of AM or PM:", res)
```

Locale equivalent of AM or PM: PM

```
In [20]: res=cd.strftime("%x")
         print("""\nLocale-appropriate formatted date (eg, in the United States, May 1, 2012 yields
         '05/01/2012)""", res)
```

Locale-appropriate formatted date (eg, in the United States, May 1, 2012 yields
'05/01/2012) 04/09/26

```
In [21]: res=cd.strftime("%X")
         print("\nLocale-appropriate time (e.g., '04:24:12 PM'):",res)
```

Locale-appropriate time (e.g., '04:24:12 PM'): 13:54:29
